

Are you a person with a developmental disability? Are you autistic? Do you have an intellectual disability?

We are creating a phone app to help people make decisions about pregnancy

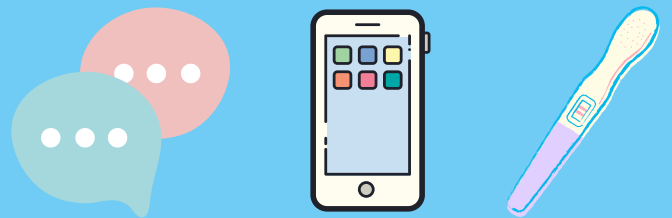

Help us understand what to put in the app!

You may be able to be in the study if:

- You have a developmental disability, such as intellectual disability or autism
- You are between 18–50 years old
- There is any possibility you could get pregnant (even if it's unlikely)
- You live in the United States

If you are in the study:

- A researcher will interview you in private
- The interview will last about an hour
- You will be paid \$50

Community members and scientists with and without disabilities are partnering on this study
