

VOLUNTEERS NEEDED FOR DIAGNOSTIC RESEARCH STUDY

Researchers from Rutgers University are recruiting participants and their parents or caregivers for a research study assessing the utility of a diagnostic interview for autism evaluations.

In order to participate in this research study, individuals should:

- Have a diagnosis of a genetic, neurodevelopmental or mental health condition (e.g., Down syndrome, ADHD, Intellectual Disability, Anxiety, Autism)
- Be between 10 years old to 35 years old.
- Have a parent/caregiver who can provide information about childhood development and current behavior and experiences.

What is involved in participation?

- Participants will complete questionnaires (if able) and *one* 2-3 hour diagnostic evaluation.
- Parents/caregivers will complete questionnaires and *two* 2-4 hour interviews.
- A 1-hour feedback session to review test results.

What do participants receive?

Families who complete the study will receive a brief written summary of results from their assessment and a \$75 gift card.

Where does the study take place?

- Participant visits will take place on the Rutgers University campus at:
 - Nelson Building (604 Allison Road; Piscataway, NJ) *or*
 - RCAAS Psychological Services Clinic (100 Dudley Road; New Brunswick, NJ).
- Parent/caregiver interviews can take place at locations above or via teleconference.
